

## REMARKS

In response to the Office Action dated August 1, 2005 ("the Action"), Applicant respectfully requests reconsideration based on the above claim amendments and the following remarks. This Amendment is submitted with a Request for Continued Examination. Applicant respectfully submits that the claims are in condition for allowance. Original Claims 1-29 and 34-45 are pending in the application. Claims 30-33 have been canceled previously in response to a restriction requirement.

### I. The 35 USC §112 Rejections

Claims 1-29 and 34-45 stand rejected under 35 USC §112, second paragraph, as being indefinite for use of certain terms, such as "mechanical elasticity", "mechanical ultimate strength" and "elasticity". Although Applicant disagrees with the Examiner's position, the noted claims have been amended for clarification of the claimed subject manner in a non-narrowing manner to obviate the indefiniteness rejections and advance prosecution. For example, the term "mechanical elasticity" has been amended to recite "compressive modulus of elasticity" as discussed in multiple places in the specification.

### II. The New Claims

In order to form a more complete claim set for the application, Applicant has added new Claims 46-71. Entry and consideration of these claims is respectfully requested. Applicant respectfully submits that the claims are supported by the specification and/or figures. Claims 46 and 47 are dependent upon base Claims 1 and 43, respectively. Support for the new dependent claims can be found in the figures and in the specification at, *inter alia*, para. 26, 46-49.

The subject matter of new independent Claim 48 is illustrated in the figures and in the specification at, *inter alia*, at para. 47-49 and para. 24. Support for Claims 49 and 50 can be found, for example, at para. 48. Support for Claim 51 can be found, for example, at para. 41, 52-53. Support for Claims 52-54 can be found, for example, at Ex. 4 and Ex. 7, and para. 26,
